

Goals:

1. allow players to create their own log in user name / password
2. allow user to see the weekly games / spreads
3. allow user to make their picks
4. allow user to see weekly results of their picks
5. allow user to see standings for the week and for the season

This is before picks are made

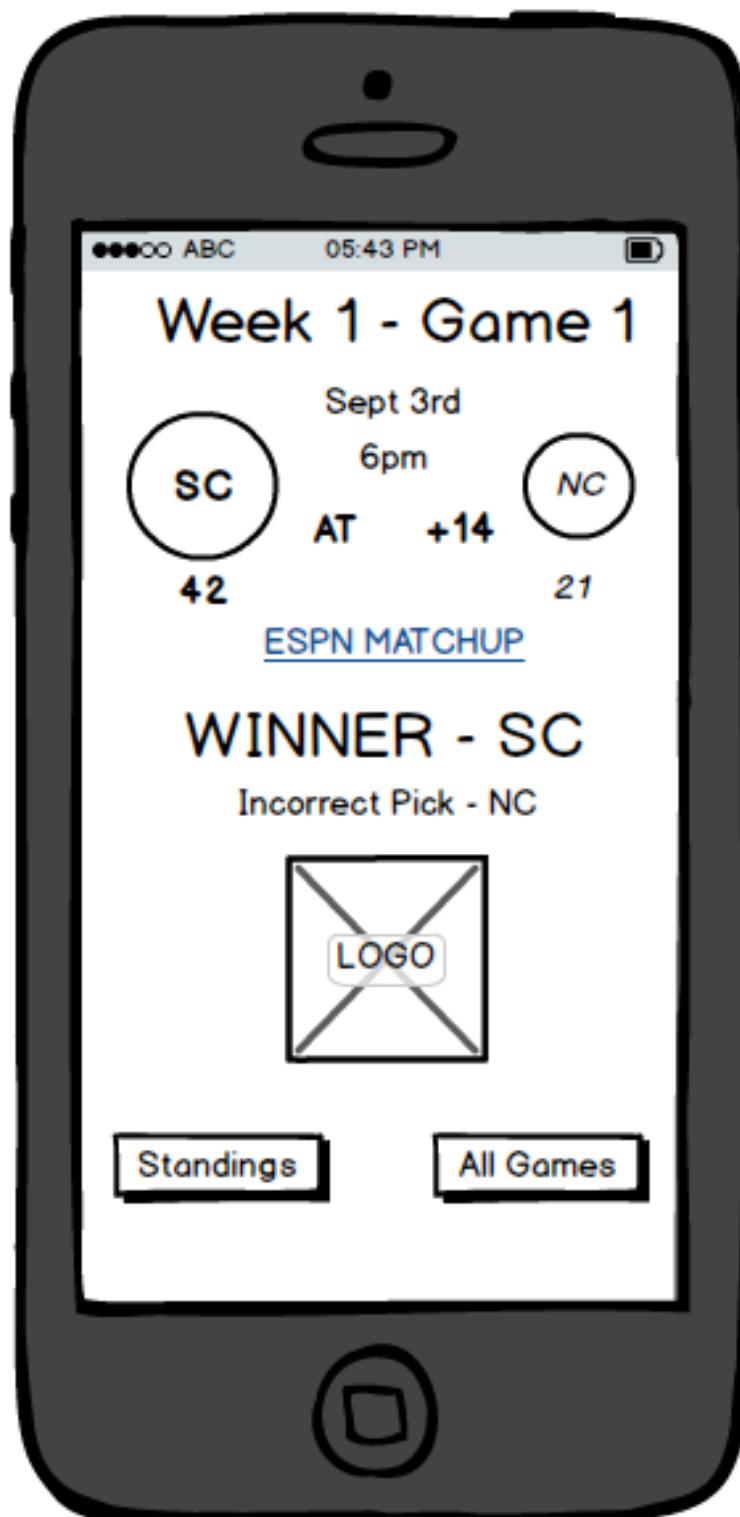

Allows user to make their pick with a drop down of the two possible teams

This is after picks are
locked in

This is after picks are
locked in

What is the best way to show winner
and if you made correct pick?

"Game #" links to the individual game ESPN page

Able to scroll down through all 10 games

Your Pick:
Will default to whatever pick is at that time, if no pick then it will say "Your Pick"
